

New Iron Infusion Service

Now available at Nambour Selangor Private Hospital

Do you suffer from fatigue, shortness of breath, or heart palpitations?

These could be signs of iron deficiency anaemia. If you've been diagnosed with anaemia or iron deficiency by your GP or specialist, or you have a chronic disease requiring iron supplementation, Nambour Selangor Private Hospital is now offering a convenient Iron Infusion Service to help you regain your energy and well-being.

Here's what you need to know:

Fast and Effective

Iron infusions deliver iron directly into your bloodstream, which can be a faster and more effective way to increase iron levels compared to oral supplements.

Iron infusion is available for patients 16 years and over, if under 18 years will require parental consent and to remain present during infusions.

Experienced Staff

Our team of nurses and doctors are experienced in administering iron infusions safely and comfortably.

Cost-Transparent

There's a one-time fee of \$170 on the day of admission, which includes the iron medication itself.

Private Health Rebates

Depending on your private health insurance plan, you may be eligible for rebates to help cover the cost. We recommend checking with your provider directly.

Ready to take the next step?

1. Talk to Your GP

Discuss your iron deficiency and see if an iron infusion is the right treatment for you.

2. Get a Referral

Your GP will complete a referral form and send it to Nambour Selangor Private Hospital via fax (07 5459 7646) or email (dayinfusionunit.np@ramsayhealth.com.au).

3. Schedule Your Appointment

Once your referral is received, our friendly administration team will contact you to schedule in a time for your iron infusion. Iron infusions are available Wednesday, Thursday and Friday.

Don't let iron deficiency hold you back. Take charge of your health and regain your energy with our Iron Infusion Service.
